👤 PROFILE

I am Natanel Lilo, a passionate full-stack developer driven by the ambition to develop innovative products that have a positive impact on people and companies. My journey into the world of software development stems from a deep-rooted curiosity and a desire to make a difference. After the COVID-19 pandemic prompted me to reevaluate my career path, I embarked on a quest to explore new possibilities. Before undertaking a comprehensive course at John Bryce, I embarked on a self-directed journey of learning, immersing myself in the world of programming. Fueled by curiosity and determination, I delved into resources and tutorials, building a solid foundation on my fascinated by programming for a long time, I made the decision to pursue it professionally.

With this self-driven preparation, I recognized the need to take my skills to the next level. I enrolled in a comprehensive course at John Bryce, where I honed my skills and graduated with honors. Throughout this journey, I discovered a profound love for problem-solving and an unwavering determination to find solutions to complex challenges. The sense of satisfaction I experience when solving bugs and developing creative solutions further fuels my passion for programming.

My ultimate ambition is to leverage my technical expertise to develop products that not only meet the needs of individuals and companies but also contribute to making the world a better place. I firmly believe that technology has the power to drive positive change, and I am eager to play a part in this transformation. With a strong foundation in programming, a commitment to continuous learning, and a deep desire to create meaningful solutions, I am now actively seeking a challenging role where I can apply my skills, contribute to building a better future, and make a lasting impact.

🎓 EDUCATION

John Bryce, Tel Aviv
